

CRAIG MULLIN, AIC

Senior Full-Stack Engineer | Enterprise Integration & Cloud

Cincinnati Area | craig@craigmullin.com

www.craigmullin.com | linkedin.com/in/craig-mullin | github.com/craigmullin

PROFESSIONAL SUMMARY

Senior full-stack engineer and technical lead with 14+ years delivering and supporting enterprise applications. Primary in-house developer spanning Java/Kotlin services, Vue/React frontends, enterprise data, AWS/OCI infrastructure, and production operations. Owns solutions from requirements through deployment and support, modernizes legacy systems, and guides vendor developers. Independent applications add recent product design and AI-assisted development experience.

PROFESSIONAL EXPERIENCE

Drees Homes | Web Developer — Full-Stack Engineering & Systems Integration

2016–Present

- Serve as primary in-house developer for enterprise applications and integration services, owning solution design, implementation, deployment, production support, and modernization.
- Build Java/Kotlin Spring Boot services and AWS Lambda integrations connecting JDE, Salesforce, Oracle CPQ, and internal systems through REST APIs, SNS/SQS, S3, and DynamoDB.
- Develop and support Vue, React, and AngularJS applications, working across frontend, authentication, API, database, web-server, and infrastructure layers.
- Build and maintain cloud infrastructure and deployment automation using AWS CDK, TypeScript, Jenkins, CodePipeline, and CodeBuild; support AWS and OCI environments.
- Lead technical implementation for Salesforce migration and other cross-system initiatives, translating functional requirements into architecture and coordinating with stakeholders and vendor teams.
- Modernize legacy Java EE, EJB, and AngularJS systems through incremental service extraction, dependency remediation, deployment improvements, and architecture documentation.
- Diagnose production issues across application code, authentication, APIs, CloudFront, Nginx, Linux services, databases, and third-party integrations.
- Mentor developers and provide technical direction, implementation guidance, and code review support to vendor teams.
- Created and maintain the Drees Integration & Systems Hub (DISH), a version-controlled systems and API knowledge base using MkDocs, AWS CDK, private S3, CloudFront, and automated endpoint/routing inventories.

EARLIER EXPERIENCE

Great American Insurance Group | Application Analyst & Developer

2012–2016

- Configured and extended Guidewire ClaimCenter using Gosu, Java, XML, and SQL, translating business requirements into maintainable application behavior.
- Partnered with claims professionals, analysts, and technical teams through requirements analysis, development, testing, and production releases.
- Automated application builds and deployments using Apache Ant and supported production releases.

Great American Insurance Group | Claim Specialist

2005–2012

- Managed complex commercial insurance claims, developing insurance domain expertise and an end-user perspective that informed a subsequent software career.

SELECTED INDEPENDENT PROJECTS

Product design & AI-assisted development | www.craigmullin.com

DartStat — Created darts practice and statistics application, defining scoring workflows, session statistics, and visual design. Iterated through AI-assisted development and hands-on use.

WordFlare — Created a mobile-first word game featuring offline puzzles, custom source words, and a pressure-free Zen Mode using React, TypeScript, and Firebase.

Ledger — Created a vehicle maintenance application around service-history needs; defined workflows and enhancement requirements for search, maintenance planning, and vehicle specifications.

TECHNICAL SKILLS

Backend: Java, Kotlin, Spring Boot, Java EE, JAX-RS, EJB, JPA, REST/SOAP

Frontend: JavaScript, TypeScript, Vue, React, AngularJS, HTML, CSS

Cloud: AWS Lambda, API Gateway, S3, SNS/SQS, DynamoDB, CloudFront, CDK, CodePipeline, CodeBuild; OCI

Data & enterprise systems: Oracle, SQL Server, SQL, Salesforce, Oracle CPQ, JDE, Guidewire ClaimCenter

DevOps & operations: Jenkins, Git, Gradle, Linux, Nginx, systemd, Podman, CI/CD

EDUCATION

Bachelor of Arts, Philosophy — Northern Kentucky University

Java Programming Course — MAX Technical Training

Associate in Claims — The Institutes
